About the course

This course is intended for all those involved in ultrasound scanning of the fetal heart and is suitable for sonographers, obstetricians, radiologists and cardiologists. Areas to be covered include

- use of Doppler techniques in the assessment in the fetal heart
- transposition of the great arteries
- septal defects
- cardiac asymmetry
- Early fetal echocardiography

The content will be delivered by the experienced fetal cardiology team from the Evelina Children's Hospital in London. The lectures will be supplemented by live demonstration of fetal heart scanning, and all delegates will receive a CD of relevant information and images.

Cost: £300.00 inc VAT, lunch and tea/coffee.
